

## QIMRB GUARDIANS User Story 8: Use Case Diagram

### Other User Interactions and Benefits

**Clinicians** benefit from ease of compliance and a greater confidence the data they are collecting will be shared according to the consented uses only.

**Data Generators** benefit from the ease and clarity of using DUO consent coding to express the consented use in an unambiguous manner.

**Data Protection Authorities** can more easily audit the compliance of data sharing to relevant laws and guidelines using DUO Codes.

\* Note: Data Use Ontology (DUO) codes are a product of the DURI (Data Use and Researcher Identity) Workstream of the Global Alliance for Genomic Health. The logo is sourced from <https://www.ga4gh.org/product/data-use-ontology-duo/>
